

FREQUENTLY ASKED QUESTIONS

THE BERYL BARBADOS PROJECT

What is the Beryl Barbados Project?

The **Beryl Barbados Project**, also called the Beryl Emergency Response and Recovery Project or BERRP, is a government-led initiative developed to support emergency response and long-term recovery efforts following the impact of Hurricane Beryl on Barbados in July 2024. It addresses the critical needs in infrastructure, livelihood of the fishing sector specifically, community resilience and disaster risk response and reduction.

Who is leading the Beryl Barbados Project?

The Government of Barbados, through the Ministry of Finance and Investment as well as the Ministry of Environment, National Beautification, Blue and Green Economy, alongside relevant national departments, with funding from the World Bank and technical assistance from the European Union.

What are the main goals of BERRP?

There are four main goals. These are:

- To provide immediate relief and recovery support to affected populations.
- To rebuild and strengthen critical infrastructure.
- To support the livelihoods of vulnerable communities, especially coastal and fisheries sectors which were largely impacted.
- To enhance long-term resilience to future disasters through improved planning and coordination.

What areas or sectors does the project focus on?

- Emergency relief and shelter
- Coastal and fisheries recovery
- Disaster preparedness and climate resilience
- Port infrastructure restoration

Who are the main beneficiaries?

The **Beryl Barbados Project**, primarily benefits individuals and communities directly affected by Hurricane Beryl, with focus on vulnerable groups, including coastal communities, fisherfolk, women, children, the differently abled and the elderly.

THE BERYL BARBADOS PROJECT

How can stakeholders get involved in the project?

Stakeholders can participate through consultations, community and town hall meetings, implementation partnerships, capacity-building sessions, or by providing feedback via communication channels established by the project team.

What kind of support will fisherfolk receive under the project?

Support includes repair and replacement of damaged boats through loans and grant assistance; restoration of landing facilities; development of concepts for sustainable support to fisherfolk, including insurance schemes.

Is the project only focussed on physical infrastructure?

No. While repair to physical infrastructure is a key component, the Beryl Barbados Project also includes social and economic recovery initiatives, capacity building, psychosocial support, and community resilience planning.

How long will the project run?

The project is scheduled to run from 2024 to 2030, covering both the emergency response immediately following Hurricane Beryl's impact, as well as medium-term recovery activities.

How is the project funded?

Funding comes through a US\$54 million loan from the World Bank to the Barbados Government.

How will the project ensure transparency and accountability?

The **Beryl Barbados Project** will follow strict financial management, monitoring and reporting standards. Regular updates, community consultations, and grievance mechanisms will be in place to ensure that transparency and responsiveness are also upheld.

What is in place to redress grievances and how do I access it?

There is a grievance mechanism in place in accordance with international best practice and standards, to allow stakeholders to submit complaints or concerns about the project's implementation. You can access it via the project's webpage located within the Barbados Fisheries Division website, via the hotline (246-289-2494) or via email - berrpbarbados@gmail.com.

THE BERYL BARBADOS PROJECT

Will there be opportunities for local contractors and service providers?

Certainly. The project encourages the engagement of local contractors and suppliers through transparent procurement processes to support economic recovery as well as job creation. Some ongoing works are already being done through local services.

How will environmental concerns be addressed?

Environmental safeguards and standards have already been integrated into all project activities, including those still to be done. This is to ensure sustainable reconstruction and to minimise ecological impacts, particularly in coastal zones.

Where can I get more information about the project?

The project has created a BERRP webpage, which is housed within the Barbados Fisheries Division's website at **fisheries.gov.bb**. Here is where all official information about the project will be posted, including notice boards, updates and engagements, statements and releases, newsletters and other downloadable content. Additionally, you can follow the **Beryl Barbados Project** social media pages on Instagram, Facebook, YouTube and LinkedIn.
